OUR QUALITY CONTROL

Elcon has a 100% quality control which will be made as follows:

1.) ~~24 HOURS BOILING TEST OR COPPER SULFATE TEST~~

After the boiling / copper sulfate test we check the instruments very carefully on the SURFACE. If something would be wrong with the raw material we would see that after the boiling test because small damages in the surface of the Material cause rust.

2.) DIMENSIONAL TEST

We compare the instruments with the PRODUCTION SAMPLE.
The length & diameters & finishing of the instrument.

3.) HARDNESS TEST

We are checking all our instruments with high end digital hardness testing equipment to avoi any deviation from our standarts in advance.

4.) SHARPNESS TEST

We are checking the cut of each and every scissors with THERA BAND for example.
