

Medel Jet Pro

HIGH EFFICIENCY BREATH-ENHANCED DRUG DELIVERY SYSTEM

MedelJet Pro is a high efficiency breath-enhanced nebulizer. The fine aerosol mist **1** is produced by the injection of compressed air into the medication chamber **3**. The inspiratory (inhalation) valve **2** opens upon patient's inhalation; allowing more air into the medication chamber. Nebulization output is increased **4** from the two sources of air intake. Nebulization speed is increased and treatment time is reduced.

Technical Specifications	
Flow	5.1 L/min
Nebulization rate	0.3 ml/min
Particle size (MMAD)	0.8 μm
Fine Particle Fraction (FPF)	92.6%
Treatment time (2 mls of Ventolin)	5 minutes
Minimum & Maximum filling volume	2 to 8 mls
